**SOFTWISE[®] CORPORATION CELEBRATES 10 YEARS OF
COLLABORATION WITH CHELSEA OFFICE SYSTEMS, INC.**

STATEN ISLAND, NEW YORK, May 22, 2007 – SoftWise[®] Corporation, a provider of state-of-the-art software products for the legal industry and other professional service organizations, announced today that it is celebrating 10 years of successful collaboration with its New York-based partner, Chelsea Office Systems, Inc.

Chelsea began its association with SoftWise in June 1997 with its first sale, installation and customization of flagship product MacroSuite at a well-respected New York City law firm. Over the past ten years, the partnership between the two organizations has grown increasingly stronger. SoftWise President Bill Robertson comments, “Chelsea Office Systems shares our values, work ethic and quality-driven focus which have led to a successful working relationship over the past decade.”

In addition to marketing MacroSuite, Chelsea has sold both Out-of-Sight and Innova, further expanding the two companies’ mutual client base. Chelsea has also installed and customized Innova to leverage its built-in document assembly capabilities at numerous organizations. Says Robertson, “SoftWise Corporation looks forward to many more years of continued success and alliance with Chelsea Office Systems, Inc.”

Roberta Gelb, President of Chelsea Office Systems, Inc., added, “We are proud to be associated with SoftWise Corporation and its products. By customizing their software to build efficiency for our law customers, we have been able to save our clients a great deal of time and money over the years.”

About Chelsea Office Systems, Inc.

Chelsea Office Systems, Inc. is a leading computer support and technology training company based in New York City. Founded by Roberta Gelb in 1984, Chelsea is dedicated to serving the legal industry

by providing superior installation and training services for legal software applications. Chelsea Office consultants are highly experienced technicians and trainers specializing in the legal field.
